SUBJECT INDEX: 1988 (Vol. XXV)

Page numbers referring to 'Book Reviews' are italicized.

A

Acetylator phenotype
- and diabetic neuropathy 41
- in diabetes 41

Aggregometry
- in diabetic nephropathy 7

Alanine
- effect of muscular exercise in type I diabetes 155

Albuminuria
- after exercise test in type I diabetes 215
- by electroimmunodiffusion method 215

Amino acids
- dieting supplementation of – in experimental diabetes 117

Antilymphocyte globulin
- in pancreas transplantation . . . 69

Apolipoproteins
- effect of guar pasta on – 243
- effect of metabolic control on – . 149
- in diabetic men 149
- in diabetic women 149

B

B-cell function
- after forskolin 133
- after pancreas transplantation . . 69
- after streptozotocin 185
- and diabetic retinopathy 95
- in gestational diabetes 81
- in pregnancy 81
- in the remission phase of type I diabetes 161
- in type II diabetes 95

B-cell morphology
- after forskolin 133
- after streptozotocin 185

β-blockers
- and insulin-induced hypoglycemia . 141
- in hypertensive non-insulin-dependent diabetes 141

Blood pressure
- and exercise test in type I diabetes . 215

Branched chain amino acids
- in experimental diabetes 117

C

Calcitonin
- in prepubertal diabetic children . 173

Calcium
- in prepubertal diabetic children . 173

Cardiomyopathy
- in diabetes 227
- vectorcardiographic study of – . . 227

Cholesterol
- and β-blockers 141
- and metabolic control 149
- effect of guar pasta on – 243
- effect of metformin on – 55
- effects of plants on – 1

Coagulation factors
in diabetes with autonomic neuropathy 235
Complications of diabetes mellitus
acetylator phenotypes and – . . . 41
neurologic – a book *363*
surgical septic complications . . . 49
vascular – a book *363*
Computer-assisted therapy
insulin treatment and – 33
Continuous subcutaneous insulin infusion (CSII)
in newly-diagnosed type I diabetes . 343
C-peptide
after pancreas transplantation . . 69
and duration of diabetes 141
in diabetic retinopathy 95
in gestational diabetes 81
in pregnancy 81
in remission phase of type I diabetes 161
in type II diabetes 95
Creatine content
in red blood cells 315
Cyclosporin
protocol of – in pancreas transplantation . . . 69

D

Diabetes mellitus
and apolipoproteins 149
and computer-assisted therapy . . 33
and gastric function 333
and honeymoon 161
and lysosomal enzymes 351
and personality 109
and cardiovascular complications a book *91*
cardiovascular risk factors in childhood a book *364*
epidemiology a book *91*
general reviews a book *363*
in prepubertal children 173
patient education a book *91*
prevention of – a book *364*
psychological tests in – 109
surgical septic complications in – . 49
Diabetic autonomic neuropathy
and gastric acid secretion 333
and gastrointestinal involvement . 333
and fibronectin 235
and hemorheology 235
Diabetic foot
plasma glucose and – 25
rapid healing of – 25
Diabetic nephropathy
aggregometry in – 7
Diabetic neuropathy
aggregometry in – 7
Diabetic personality 109
Diabetic retinopathy
aggregometry in – 7
Diet
and C-peptide levels in type II diabetes 289
comparison with sulfonylureas . . 289
in type II diabetes 289

E

Electroencephalogram
in insulin-dependent diabetes . . 109
Electron microscopic findings
of B-cell after forskolin 133
Electrophoresis
– of carboxylmethylated glucose . 127
– of carboxylmethylated insulin . 127
Erythrocytes
creatine content 315
insulin receptors in – 205, 315
Esophageal manometry
in diabetic autonomic neuropathy . 333

Experimental diabetes mellitus
and gamma glutamyl treatment . . 299
and insulin treatment 299
and sex of animals 303
by streptozotocin 185, 299
in eSS mice 303

F

Fasting hyperglycemia
and B-cell function 161
Fibronectin
and diabetic autonomic neuropathy 235
and hemorheology in diabetes . . 235
Fibrinogen
and hemorheology in diabetes . . 235
in diabetes 63
Forskolin
and insulin release 133
effect on B-cells 133
Free fatty acids
effect of muscular exercise on – in type II diabetes 155
Free insulin
after insulin mixture 265
and insulin-antibodies 259
and metabolic control 259
extractive method of – 259
Freund's adjuvant (CFA)
in streptozotocin-treated mice . . 185
Fructosamine
and metabolic control 63
diagnostic value of – 63
in type II diabetes 63

G

Gamma–glutamyl transferase
effect of insulin on - in experimental diabetes 299
in streptozotocin-induced diabetes 299
Gastric emptying time
in diabetic autonomic neuropathy 275, 333
Gastric function
acid secretion in diabetes . . 275, 333
– and gastrin secretion in diabetes 275, 333
– and parietal cell antibodies in diabetes 275, 333
in diabetic autonomic neuropathy 275, 333
study of – with pentagastrin in diabetes . . 333
Gastrin
and diabetic autonomic neuropathy 275, 333
Gestational diabetes
and lysosomal enzymes in the newborn 351
B-cell resistance in – 81
insulin resistance in – 81
glucose clamp in – 81
Glibenclamide
– test in the remission phase of type I diabetes 161
Gliclazide
comparison with diet alone . . . 289
in type II diabetes 289
Glucagon
after IVITT with or without β-blockers 141
carboxylmethylation of – 127
Glucose
– concentration and phagocytic function of neutrophils 283
Glucose clamp
in gestational diabetes 81
in pregnancy 81
Glycosuria
and computer-assisted therapy . . 33
Glycosylated hemoglobin
correlation of – with glycated serum protein 325
method of analysis a book *91*
Glycated serum protein
correlation of – with glycosylated hemoglobin 325

correlation of – with plasma glucose 325
in impaired glucose tolerance . . 325
in non-insulin-dependent diabetes 325

Glycosylation
of protein in diabetes 91, 325

Guar
effect of –
– pasta on lipids in diabetes . . . 243
– pasta in obese diabetic women . 243
– pasta in obese women 243

H

HDL cholesterol
and β-blockers 141
and metabolic control 149
effect of guar pasta on – 243
effect of metformin on – 55

HDL_2-cholesterol
effect of metformin on – 55

HDL_3-cholesterol
effect of metformin on – 55

Honey
in type II diabetes 197

Honeymoon
in newly diagnosed type I diabetes . 343

Hypertension
and β-blockers in type II diabetes . 141

Hypoglycemia
and β-blockers in diabetes 141
and penbutolol 141
and propranolol 141
insulin-induced – in type II diabetes 141

I

Immune complexes
in diabetic patients 13

Immunology
in newly diagnosed type I diabetes . 343

Immunosuppression
protocols of – in pancreas
transplantation 69

Impaired glucose tolerance
and glycated serum protein . . . 325

Insulin
and β-blockers 141
carboxylmethylation of – 127
dosage of plasma – by ELISA . . 205
plasma profiles after honey
in type II diabetes 197
plasma profiles after
pancreas transplantation 69
– requirement in newly
diagnosed type I diabetes . . . 343
secretion after forskolin 133

Insulin antibodies
relation to free insulin 259

Insulin mixture
free insulin after – 265
therapeutic effects of – 265
miscibility of – 265

Insulin receptors
effect of diet on – 205
high-carbohydrate high-fiber diet
and – 205
in acromegaly 315
in non-obese type II diabetes . . 315
in obese type II diabetes 315
in relation to menstrual phase . . 315
– of erythrocyte in type II diabetes 205

Insulin resistance
in gestational diabetes 81
in pregnancy 81

Insulin therapy
and insulin antibodies 265
and free-insulin 265
miscibility of different types of
insulin 265

Islet cell antibodies (ICA)
and honeymoon of type I diabetes . 161
in newly diagnosed type I diabetes . 343

I.v. glucose tolerance test (IVGTT)
in the remission phase of insulin-
dependent diabetes 161

I.v. insulin tolerance test (IVITT)
and β-blockers 141

K

Ketosis
and muscular exercise 155

L

Lactate
effect of muscular exercise on – . 155
effect of OGTT on – 247
Lipids
effect of guar pasta on – 243
effect of metformin on – 55
Lymphocyte T
in insulin-dependent diabetes . . 343
in relation to remission of insulin-dependent diabetes 343
Lysosomal enzymes
in infants of diabetic mothers . . 351

M

Mean blood glucose
and fructosamine 63
Metabolic control
and muscular exercise 155
and relation to free insulin . . . 259
Metformin
and serum lipids 55
plasma concentrations of – . . . 55
Mixed meal
test in the remission phase of type I diabetes 161
Muscular exercise
and albuminuria in type I diabetes . 215
and blood pressure in type I diabetes 215
and diabetic nephropathy 215
effect of – on amino acids . . . 155
effect of – on lactate 155
in relation to metabolic control . . 155
metabolic effects of – in type I diabetes 155

N

Neutrophils
and diabetic complications . . . 283
in diabetic patients 13
phagocytosis of – and glucose concentration 283

O

Obesity
effect of guar-pasta in obese diabetic women 243
Oral glucose tolerance test (OGTT)
and blood lactate in diabetics . . 248
in gestional diabetes 81
in pregnancy 81
in the remission phase of insulin-dependent diabetes 161

P

Pancreas transplantation
glycemic and insulinemic profiles after – 69
immunosuppression therapy in – . 69
metabolic evaluation after – . . . 69
neoprene duct injection in – . . 569
Parathormone
plasma levels in prepubertal diabetic children 173
Penbutolol
in hypertensive type II diabetes . . 141
Pentagastrin
study with – di diabetic autonomic neuropathy 333
Phagocytic activity
in diabetic patients 13
Phosphorus
plasma levels in prepubertal diabetic children 173
Plants
lipid lowering effects of – 1
Plasma glucose
after honey in type II diabetes . . 197

and lactate after OGTT in diabetes . 247
control of – and diabetic foot . . 25
effect of muscular exercise on – 155, 215
effect of plants on – 1
profiles after pancreas transplantation 69

Platelets
aggregometry in diabetic microangiopathy 7

Propranolol
in hypertensive type II diabetes . . 141

Psychological tests
in insulin-dependent diabetes . . 109

S

Streptozotocin-induced diabetes
and acinar cell damage 185
and amino acid diet 117
and B-cell morphology 185
metabolic parameters in – . . . 117

T

Triglycerides
after honey in type II diabetes . . 197
and metabolic control 149
effect of metformin on – 149
effects of plants on – 1

V

Vectorcardiography
in diabetic cardiomyopathy . . . 227

Viscosity
and hypertension 101
in plasma of diabetes and hypertension 101
in serum in relation to hemorheology in diabetes 235
in serum of diabetes 101

Vitamin D
metabolites of – in prepubertal diabetic children 173
plasma levels in prepubertal diabetic children 173

W

Working capacity
in type I diabetes 215
